Plant Pathology

An international journal edited by the
British Society for Plant Pathology

SENIOR EDITOR

B. E. J. Wheeler
Imperial College, Silwood Park, Ascot, Berks, UK

DEPUTY EDITOR
P. R. Scott *Cambridge*

EDITORIAL BOARD

A. Bainbridge *Rothamsted*
K. W. Bailiss *Wye*
D. L. Ebbels *Harpenden*
M. Gratwick *Harpenden*
D. S. Ingram *Cambridge*
B. G. Lewis *Norwich*
P. G. Markham *Norwich*
T. F. Preece *Leeds*
D. J. Royle *Bristol*

ADVISORY BOARD

J. Benada *Kromeriz*
J. A. Browning *Texas A & M*
R. J. Cook *Pullman*
R. C. Close *Canterbury, N.Z.*
P. R. Day *Cambridge*
J. Dekker *Wageningen*
B. J. Deverall *Sydney*
S. G. Georgopoulos *Athens*
A. J. Gibbs *Canberra*
A. Graniti *Bari*
J. M. Hirst *Bristol*
A. Johnston *London*
J. Katan *Rehovot*
J. A. Kavanagh *Dublin*
J. Kranz *Giessen*
D. R. Knott *Saskatoon*
S. Nishimura *Nagoya*
J. Rishbeth *Cambridge*
V. Smedegaard-Petersen *Copenhagen*
D. N. Srivastava *New Delhi*
P. H. Williams *Wisconsin*
R. K. S. Wood *London*
J. C. Zadoks *Wageningen*

Plant Pathology is published for the British Society for Plant Pathology which is solely responsible for editorial policy. It has been developed from the journal with this title previously published by Her Majesty's Stationery Office for the Ministry of Agriculture, Fisheries and Food for England and Wales and maintains the sequence of those volumes.

Plant Pathology publishes research papers and critical reviews on all aspects of plant pathology. Short reports of new or unusual records of plant diseases are also published. Letters to the editors are welcome when these comment on matters relevant to plant pathology.

Subscription rates
Plant Pathology is published quarterly; the four parts each year constitute one volume. The subscription rates for 1983 are £39.00 (UK), £45.00 (overseas) and $94.50 (USA and Canada). It is delivered by air freight to North America so subscribers there should receive their copies within 2 weeks of publication.

US Mailing Agent, Expeditors of the Printed Word Ltd, 527 Madison Avenue, Suite 1217, New York NY 10022. Second class postage paid at New York, NY. Postmaster: send address corrections to *Plant Pathology*, c/o Expeditors of the Printed Word Ltd, 527 Madison Avenue, New York, NY 10022 (US Mailing Agent).

Orders and remittances for subscriptions, including orders for back issues, should be sent to Blackwell Scientific Publications, PO Box 88, Oxford.

This journal is covered by *Current Contents*, *ASCA* and *Science Citation Index*.

Advertisement bookings and enquiries should be sent to the Advertisement Manager, Blackwell Scientific Publications Ltd, Osney Mead, Oxford OX2 0EL (Telephone 0865 240201).

Contents

VOLUME 32 NUMBER 1

1 British Society for Plant Pathology

3 Editorial

5 *M. J. Jeger.* Analysing epidemics in time and space

13 *G. Esler and J. R. Coley-Smith.* Flavour and odour characteristics of species of *Allium* in relation to their capacity to stimulate germination of sclerotia of *Sclerotium cepivorum*

23 *N. Q. R. Nathaniels and G. S. Taylor.* Latent infection of winter oilseed rape by *Leptosphaeria maculans*

33 *F. M. Humpherson-Jones.* The occurrence of *Alternaria brassicicola, Alternaria brassicae* and *Leptosphaeria maculans* in brassica seed crops in south-east England between 1976 and 1980

41 *Lesley Sitch and W. J. Whittington.* The effect of variety mixtures on the development of swede powdery mildew

47 *R. I. B. Francki, J. W. Randles, T. Hatta, C. Davies, P. W. G. Chu and G. D. McLean.* Subterranean clover mottle virus: another virus from Australia with encapsidated viroid-like RNA

61 *R. C. Shattock and M. H. Rahbar Bhatti.* The effect of *Phragmidium mucronatum* on rose understocks and maiden bush roses

67 *R. C. Shattock and M. H. Rahbar Bhatti.* Fungicides for control of *Phragmidium mucronatum* on *Rosa laxa* hort.

73 *J. F. Kollmorgen, J. B. Griffiths and D. N. Walsgott.* The effects of various crops on the survival and carry-over of the wheat take-all fungus *Gaeumannomyces graminis* var. *tritici*

79 *M. J. C. Asher and C. E. Thomas.* The expression of partial resistance to *Erysiphe graminis* in spring barley

New or unusual records

91 *M. L. Edwards, J. I. Cooper and P. R. Massalski.* Some natural hosts of brome mosaic virus in the United Kingdom

95 *W. S. Clark, M. J. Richardson and R. Watling.* Calyptella root rot – a new fungal disease of tomatoes

101 Book reviews

VOLUME 32 NUMBER 2

109 *J. Rotem, J. Kranz and Esther Bashi.* Measurement of healthy and diseased haulm area for assessing late blight epidemics in potatoes

117 *J. Rotem, Esther Bashi and J. Kranz.* Studies of crop loss in potato blight caused by *Phytophthora infestans*

123 *J. T. Fletcher, M. J. Hims and R. J. Hall.* The control of bubble diseases and cobweb disease of mushrooms with prochloraz

133 *S. J. Singh and W. A. Heather.* Effects of pre- and post-inoculation photoperiod on the severity of *Melampsora medusae* leaf rust of *Populus* species

141 *R. P. Thakur, K. V. Subba Rao and R. J. Williams.* Effects of pollination on smut development in pearl millet

145 *D. L. Ebbels.* Incidence of tuber diseases in classified seed potatoes harvested in England and Wales, 1974–77

151 *J. G. White.* The use of methyl bromide and carbendazim for the control of lettuce big-vein disease

159 *D. A. Greaves, A. J. Hooper and B. J. Walpole.* Identification of barley yellow dwarf virus and cereal aphid infestations in winter wheat by aerial photography

173 *Susan Alcock and B. E. J. Wheeler.* Variability of *Cryptostroma corticale*, the causal fungus of sooty bark disease of sycamore

177 *Judith M. Norwood, R. W. Michelmore, I. R. Crute and D. S. Ingram.* The inheritance of specific virulence in *Bremia lactucae* (downy mildew) to match resistance factors 1, 2, 4, 6 and 11 in *Lactuca sativa* (lettuce)

187 *M. J. Jeger, Ellis Griffiths and D. Gareth Jones.* Seasonal variation in the components of partial resistance of seedlings of winter wheat cultivars Maris Huntsman and Maris Ranger to *Septoria nodorum*

197 *R. Rajeshwari, N. Iizuka, B. L. Nolt and D. V. R. Reddy.* Purification, serology and physico-chemical properties of a peanut mottle virus isolate from India

207 *E. Shabi, Talma Katan and Kela Marton.* Inheritance of resistance to benomyl in isolates of *Venturia inaequalis* from Israel

213 *Annie Lam.* Leaf area guides for assessing fungal leaf diseases of ryegrasses (*Lolium* spp.)

New or unusual records

217 *W. Fitzgerald and B. M. Cooke.* A seedling blight of barley caused by *Septoria nodorum*

221 Book reviews

VOLUME 32 NUMBER 3

229 *M. J. Drinkall and T. V. Price.* Dispersal of *Synchytrium psophocarpi* in Papua New Guinea

239 *J. E. King, J. E. E. Jenkins and W. A. Morgan.* The estimation of yield losses in wheat from severity of infection by *Septoria* species

251 *D. C. Sutton and B. J. Deverall.* Studies on infection of bean (*Phaseolus vulgaris*) and soybean (*Glycine max*) by ascospores of *Sclerotinia sclerotiorum*

263 *J. van den Heuvel and Lydia P. Watterreus.* Conidial concentration as an important factor determining the type of prepenetration structures formed by *Botrytis cinerea* on leaves of French bean (*Phaseolus vulgaris*)

273 *P. J. Chapman.* The effectiveness of 1,3-dichloropropene for controlling virus vector nematodes with reference to the MAFF Certification Scheme for strawberry nursery stock

281 *C. D. Green, M. F. Ghumra and G. A. Salt.* Interaction of root-lesion nematodes, *Pratylenchus thornei* and *P. crenatus*, with the fungus *Thielaviopsis basicola* and a grey sterile fungus on roots of pea (*Pisum sativum*)

289 *G. N. Ngala. Sarocladium attenuatum* as one of the causes of rice grain spotting in Nigeria

295 *P. Magro, P. Marciano and P. Di Lenna.* Metabolic alteration induced by *Botrytis allii* in two onion cultivars with different resistances to neck rot

303 *T. W. Hollins, G. J. Jellis and P. R. Scott.* Infection of potato and wheat by isolates of *Rhizoctonia solani* and *R. cerealis*

311 *J. F. Jenkyn, G. V. Dyke and A. D. Todd.* Effects of fungicide movement between plots in field experiments

325 *M. J. Adams and R. L. Griffith.* The effect of temperature before or after inoculation with *Phoma exigua* var. *foveata* on the development of gangrene in potato tubers

335 *E. Bruzzese and S. Hasan.* A whole leaf clearing and staining technique for host specificity studies of rust fungi

339 *D. A. Cooke, P. L. Mathias, Daphne M. Chwarszczynska and L. J. Coppock.* Comparison of methods of assessing field populations of *Heterodera schachtii*

345 *R. P. Blackshaw.* The annual leatherjacket survey in Northern Ireland, 1965–82, and some factors affecting populations

New or unusual records

351 *A. R. Chase.* Leaf rot of four species of Crassulaceae caused by *Colletotrichum gloeosporioides*

353 *P. W. G. Chu, R. I. B. Francki and T. Hatta.* Some properties of tomato ringspot virus isolated from *Pentas lanceolata* in South Australia

357 *S. C. Wilson, V. H. Knight and D. J. Barbara.* Raspberry bushy dwarf virus and field infection of Malling Jewel

361 Book reviews

VOLUME 32 NUMBER 4

367 Editorial

369 *Emeline Haight and Adrian Gibbs.* Effect of viruses on pollen morphology

373 *J. R. Coley-Smith and G. Esler.* Infection of cultivars of onion, leek, garlic and *Allium fistulosum* by *Sclerotium cepivorum*

377 *N. S. Price, D. T. Clarkson and N. M. G. Hague.* Effect of invasion by cereal cyst nematode (*Heterodera avenae*) on the growth and development of the seminal roots of oats and barley

385 *J. M. Mackay and P. J. Shipton.* Heat treatment of seed tubers for control of potato blackleg (*Erwinia carotovora* subsp. *atroseptica*) and other diseases

395 *N. E. Malathrakis and D. J. Vakalounakis.* Resistance to benzimidazole fungicides in the gummy stem blight pathogen *Didymella bryoniae* on cucurbits

401 *F. Fatemi and B. D. L. Fitt.* Dispersal of *Pseudocercosporella herpotrichoides* and *Pyrenopeziza brassicae* spores in splash droplets

405 *I. R. Crute, Kathleen Phelps, A. Barnes, S. T. Buczacki and P. Crisp.* The relationship between genotypes of three *Brassica* species and collections of *Plasmodiophora brassicae*

421 *J. D. S. Clarkson and R. J. Cook.* Effect of sharp eyespot (*Rhizoctonia cerealis*) on yield loss in winter wheat

429 *Marion H. Ebben, Doreen G. Gandy and D. M. Spencer.* Toxicity of methyl bromide to soil-borne fungi

435 *J. Varughese and Ellis Griffiths.* Effect of barley yellow dwarf virus on susceptibility of barley cultivars to net blotch (*Pyrenophora teres*) and leaf blotch (*Rhynchosporium secalis*)

441 *M. A. Chaldecott and T. F. Preece.* The use of a tomato cotyledon test to identify *Corynebacterium michiganense* pv. *michiganense*

449 *A. M. Al-Hamdani, R. S. Lutchmeah and R. C. Cooke.* Biological control of *Pythium ultimum*-induced damping-off by treating cress seed with the mycoparasite *Pythium oligandrum*

New or unusual records

455 *I. R. Crute and I. G. Burns*. Powdery mildew of lettuce (*Lactuca sativa*)

459 *D. Parfitt, J. R. Coley-Smith and T. M. Jeves. Teratosperma oligocladum*, a mycoparasite of fungal sclerotia

461 *T. F. Preece and S. J. Roberts. Pseudomonas syringae* causing a leaf spot and flower blight of Mock Orange, *Philadelphus coronarius*, in England

465 *M. W. Shaw and G. M. Haughs*. Damage to potato foliage by *Sminthurus viridis* (L.)

467 *S. K. Ghose, G. N. Hait, S. K. Samanta and Subir Sen. Fusarium* wilt disease of *Solanum khasianum*

469 *J. I. Cooper, M. L. Edwards, M. K. Arnold and P. R. Massalski*. A tobravirus that invades *Fraxinus mariesii* in the United Kingdom

473 Book reviews
